renewable energy incentives

aps offers a variety of incentives to residential customers for the purchase and installation of several renewable energy solutions. These incentives are paid to customers with current reservations after the project has been completed and all payment requirements have been met.

Reservation applications are logged in the order in which they are received. Applications are confirmed once aps verifies necessary program documentation has been received.

solar initiatives - updated 01/20/2012

grid tied solar panels (photovoltaics)

There's plenty of sunlight in Arizona. And now, with aps rebates and available federal and state tax credits, powering your home with the sun is very affordable. Once installed, solar panels turn sunlight into non-polluting energy. Your home will remain connected to the aps grid, so you'll always have energy anytime you need it. When your system produces more power than you need, the electricity is fed back into the APS grid and you can be credited for that power.

[find out more](#)

off-grid solar panels (photovoltaics)

Cil id et que eum adidunt, sitaque elestrum quo dolorunt offi item ea pelitaqui dolupictus minim alis sincidebis et, solest, omnissima simagna tiumquatem a conessimus. Il eaqui tecto odit volut re ex etur, elis ut rectur, sitiataq uatemquunt et velente molorumet est at.

solar water heaters

Installing a solar water heater makes financial sense. Heating water for your household can account for up to 15% of your energy bill. With APS incentives and federal and state tax credits, you can save up to 80% on the cost of the water heater, leading to a quick payback on your investment.

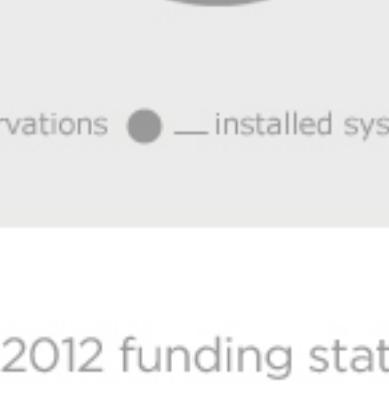

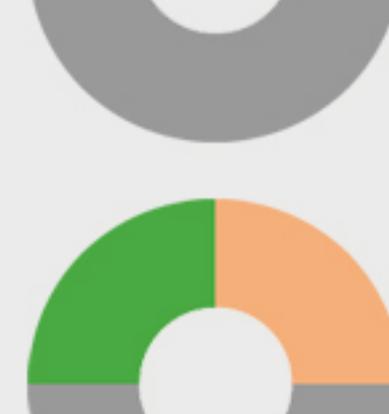

[find out more](#)

solar space heating

In the cooler climates of Arizona, a solar space heating system can be used to provide heat for your home. Even during the winter months, a solar thermal system can transfer the heat from the sun to your home, keeping it warm while lowering your energy cost.

renewable energy standard

The Renewable Energy Standard (RES) is approved by the Arizona Corporation Commission. Incentives from this program are designed to help our customers take advantage of the renewable energy resources available in our state. Doing so will help decrease air pollution, reduce energy costs for participating customers and help build a more sustainable future for all Arizonans.

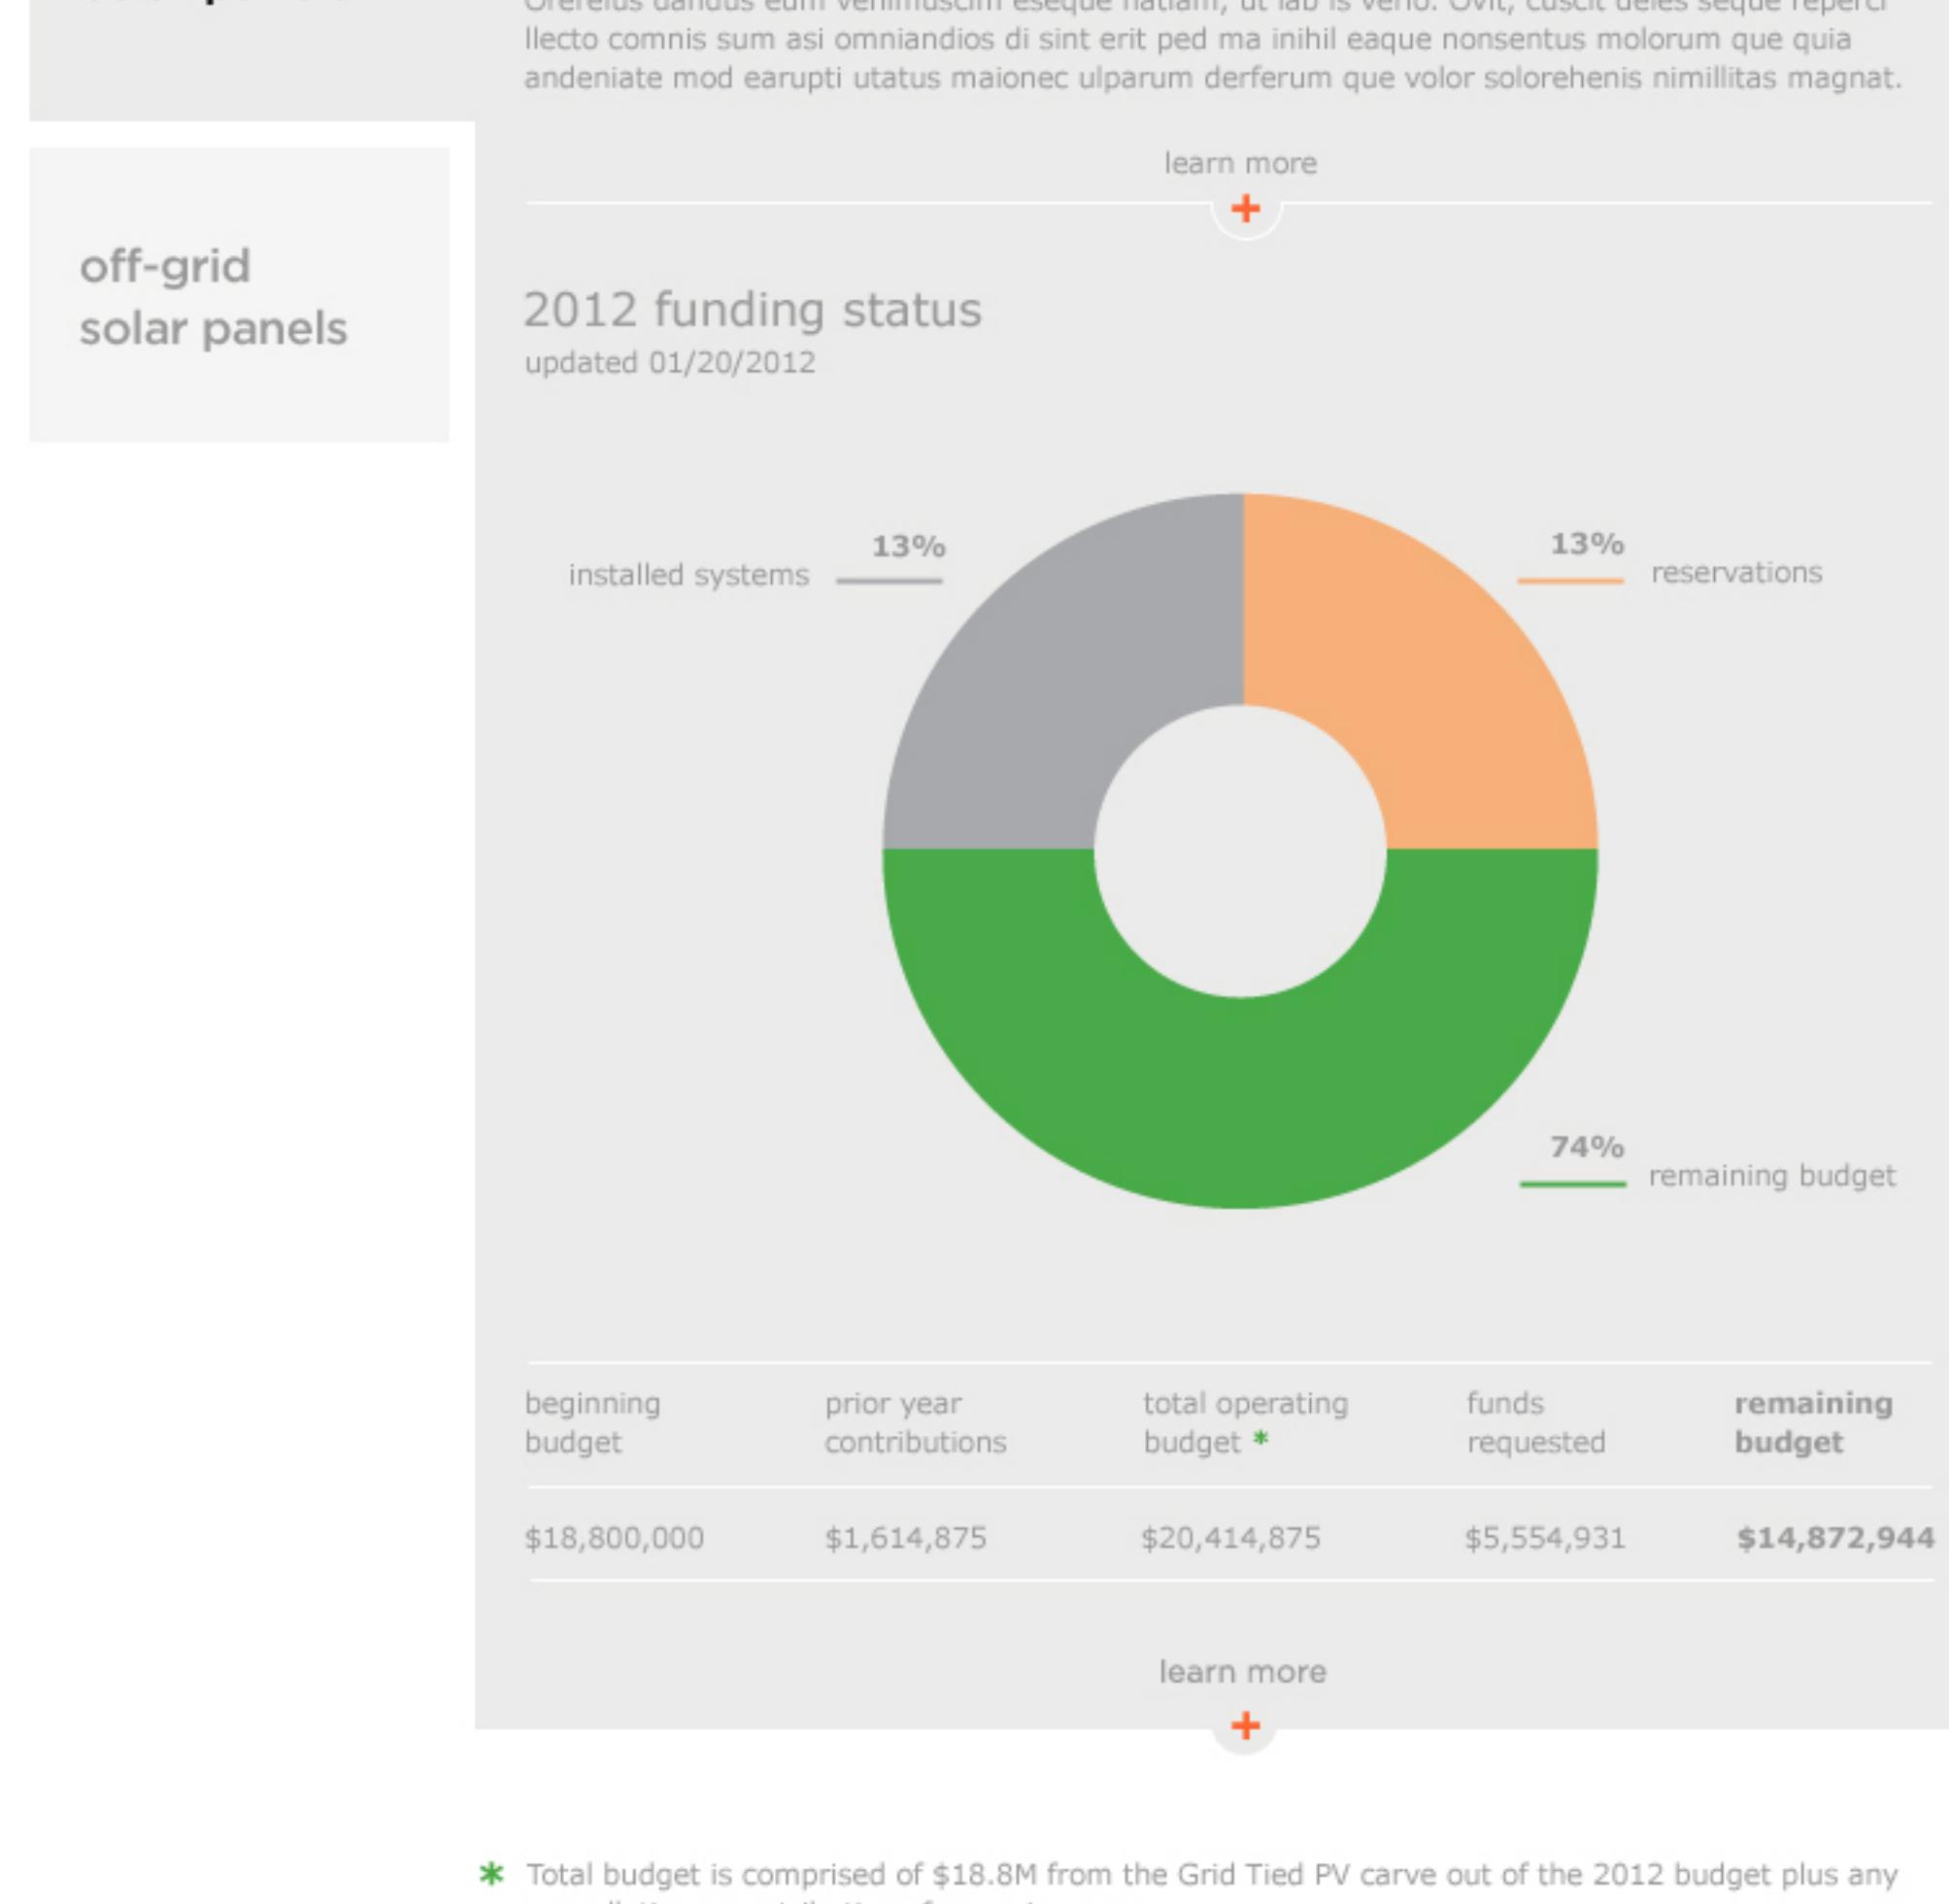

The goal of the RES is for 15 percent of our retail energy sales to come from renewable energy resources by the year 2025. For 2012, 3.5 percent of the energy we provide must be derived from renewable energy resources. Of that percentage, 25 percent must come from Distributed Energy -- resources that are installed on the customer's premises and are used to offset customer load, such as rooftop solar panels.

Reservation applications are logged in the order in which they are received. Applications are confirmed ("Reserved") once APS verifies necessary program documentation has been received. Incentive and funding levels are subject to change based on Arizona Corporation Commission Order.

Prior to payment of residential renewable energy incentives, customers must submit a W-9 form to APS. APS does not require a W-9 if APS customers are leasing the system and will not own the system at the end of their lease; however the lessor will be required to submit a W-9. Additional information on submitting the W-9 will be provided when customers receive their reservation confirmation. W-9 forms are available [online at the IRS website](#).

"**our target**

15 percent of our retail energy sales to come from renewable energy resources by the year 2025.

important tips for replacing or upgrading

- Have your high-efficiency system installed to the [APS Quality Installation Standards](#).
- Get the right size unit for your home.
- Have your system professionally installed by an [APS Rebate Eligible Contractor](#).

how it works

- 1 Confirm your eligibility
- 2 Schedule an appointment with an APS Rebate Eligible Contractor. You must use an APS.
- 3 Your contractor will complete these steps and then help you fill out and send in the rebate application.
- 4 APS processes your application and a rebate check is mailed to you in 6 – 8 weeks
- 5 Enjoy peace of mind and comfort with energy savings on your new high efficiency AC system.

dusk to dawn guidelines

general

Dusk to Dawn Lighting is a leased lighting program through APS for private property such as Gated Communities, parking lots, alleys, etc. APS will own and maintain the equipment. Customer owned Dusk to Dawn lights are also available where the customer owns the equipment. APS will maintain lamps only if APS standard equipment is installed. All customer owned Dusk to Dawn lights are subject to the code requirements of the governing municipality. If lighting is part of a construction project, please contact the APS Project Leader for your area. If your project is for Dusk to Dawn lighting only, please contact Outdoor Lighting.

[overview](#)[steps to qualify](#)[find a contractor](#)[faqs](#)

important tips for replacing or upgrading

- Have your high-efficiency system installed to the [APS Quality Installation Standards](#).
- Get the right size unit for your home.
- Have your system professionally installed by an [APS Rebate Eligible Contractor](#).

did you know?

The study of 75,000 field tests revealed that over 75% of installed equipment fails to meet manufacturer specifications for airflow and refrigerant charge.

[learn more](#)

how it works

1 Confirm your eligibility**2** Schedule an appointment with an APS Rebate Eligible Contractor. You must use an APS.**3** Your contractor will complete these steps and then help you fill out and send in the rebate application.**4** APS processes your application and a rebate check is mailed to you in 6 – 8 weeks**5** Enjoy peace of mind and comfort with energy savings on your new high efficiency AC system.

eligibility

Must be a current APS customer.

The main components of the unit must be installed within five days of each other.

Rebate application form must be submitted to APS within 6 months of installation date.

Schedule an appointment with an APS Rebate Eligible Contractor. You must use an APS Rebate Eligible Contractor to qualify for rebates.

Unit must be a new installation that replaces an existing heat pump or air conditioner (AC) in an existing home served by APS.

streetlight program

Lore ipsum dolor sit amet, consectetur adipisicing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nos remet, consectetur.

[overview](#)[developer installed](#)[outdoor lighting contacts](#)[city contact numbers](#)[FAQs](#)

aps streetlight names

Welcome to Outdoor Lighting. This section is designed to assist with any questions relating to dusk to dawn lighting, streetlight installations, rates, state lighting ordinance for Phoenix Metro and Statewide areas, APS approved manufacturers and more.

dusk to dawn guidelines

general

Dusk to Dawn Lighting is a leased lighting program through APS for private property such as Gated Communities, parking lots, alleys, etc. APS will own and maintain the equipment. Customer owned Dusk to Dawn lights are also available where the customer owns the equipment. APS will maintain lamps only if APS standard equipment is installed. All customer owned Dusk to Dawn lights are subject to the code requirements of the governing municipality. If lighting is part of a construction project, please contact the APS Project Leader for your area. If your project is for Dusk to Dawn lighting only, please contact Outdoor Lighting.

installation

Most of the installation costs are covered in the E-47 rate. This is a non-metered rate based on lumen type, pole type and various other charges. The customer is responsible for all trench, conduit and j-box installation, subject to an inspection from APS. Contact your APS Project Leader for a pre-construction meeting. Term of contract A Dusk to Dawn contract is for a minimum of 3 years. Prior to any lighting installation, it is the responsibility of the customer to contact all area residents who may be affected.

signatures

A Dusk to Dawn contract must be signed prior to installation of lights. Authorized signatures include the property owner, the lessee (if they have proof that the lease term exceeds the contract term), or a person with proof of financial responsibility for a Homeowners Association, balance of contract or up and down charges. Should the Dusk to Dawn Contract be broken prior to the expiration date, the customer is responsible for the Balance of Contract or the Up and Down charges, whichever is less. Up and Down charges recover the installation and removal of said facilities. However, an assignment is an agreement signed by a new customer accepting responsibility for the balance of a Dusk to Dawn contract, which releases the original customer of further liability.

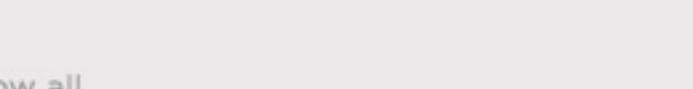

outages/maintenance

APS will use diligence in maintaining service; however, monthly bills will not be reduced due to lamp outages. The customer is responsible to report outages with address, business name and pole number(s) that require maintenance. You may also report the outage by calling (602)371-7171. Please allow up to 10 working days for normal repairs, and up to 20 working days for underground repairs.
